The preliminary amendment and IDS received 1/21/04 have been entered and claims 13-16 are currently pending in this application. Please update the specification regarding the parent case.

The specification is objected to as failing to provide proper antecedent basis for the claimed subject matter. See 37 CFR 1.75(d)(1) and MPEP § 608.01(o). Correction of the following is required: Claim 15 is directed to a concentration of PHA greater than about 20%. This concept is not found in the specification as originally filed.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 13-16 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 13(b) line 2, "the concentration" lacks antecedent basis. In claim 13(c) line 3, "the biomass" lacks antecedent basis. Claim 15 fails to further limit claim 13 from which it depends. In claim 16 line 2, "removal" may be intended to be "removing" to have proper antecedent basis.

The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

The abstract of the disclosure is objected to because it is not directed to the presently claimed invention. Correction is required. See MPEP § 608.01(b).

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
